IN REPLYING, ADDRESS THE

July 27, 1954

Communicable Disease Center
Enteric Bacteriology Laboratories
P. O. Box 188
Chamblee, Georgia

Dr. Aleck Bernstein
Department of Genetics
University of Wisconsin
Madison 6, Wisconsin

Dear Dr. Bernstein:

As requested by Dr. Lederberg I am writing you in regard to your culture SW 1104 (CDC No. 2308-54). The culture gave a slight trace of agglutination in somatic 1 serum. It probably is a 1,9,12 type which is in the 1 \pm form. So far as phase 2 is concerned your conjecture was correct. This phase should have been denoted e,n,z₁₆, z₁₈, not e,n,x. I am sorry that these errors in reporting occurred.

For the Officer-in-Charge, Bacteriology Section

Sincerely yours,

Encl.

Philip R. Edwards, Ph. D.
Bacteriologist-in-Charge
Enteric Bacteriology Unit
